

MANGO   
**BACKUP!**

## HELP PROTECT YOUR DATA AND SAFEGUARD YOUR BUSINESS OPERATIONS

### REST EASY KNOWING THAT YOUR DATA IS SAFE

- ✓ Automatically back up your data daily
- ✓ Store data on secure, off-site servers
- ✓ Receive daily alerts when your data is successfully backed up
- ✓ Access your data from anywhere
- ✓ In case of an incident, get back up and running within just minutes

### AFFORDABLE PRICING

Starting at \$250/year  
based on storage size

Losing your business data could be devastating to the operations of your business – that’s why Mango Backup securely stores your live Route Manager data on a remote server. In case anything ever happens, you can quickly, easily, and completely restore your data for immediate use.

### PROTECT IRREPLACEABLE BUSINESS DATA

Backing up files can protect against accidental loss of data caused by database corruption, hardware failures, and even natural disasters. Administrators need to make sure that backups are performed regularly, kept in a secure location, and are routinely checked to ensure they are valid and functional in order to protect against losing critical business data.

### PREVENT DATA LOSS WITH AN AUTOMATED DAILY BACK UP OF YOUR CRITICAL FILES

Never worry about your RMA data again, and rest assured that all your important files are getting backed up on a daily basis. Fully integrated into Route Manager, Mango Backup works quietly in the background to keep your data backed up to our secure off-site servers. Backups are completed automatically for you each day, and you are always notified when they are complete, giving you further reassurance that data is safe and secure.

## FULLY RESTORE YOUR DATA IN JUST MINUTES

Should you have a data failure on your active system, your data can be restored within just minutes to prevent disruptions to your business. If you have web access, you will be back in business in just minutes.

## SECURELY ACCESS YOUR DATA FROM ANYWHERE

You can choose to download the data immediately to a different system or use our web interface to access your business data from wherever you are.

## ADDED PROTECTION WITH OFF-SITE STORAGE

In case of an emergency or natural disaster, it is important to keep a copy of your data in a separate location for safe storage. Mango Backup securely stores your Route Manager data on a remote server so that if anything ever happens to your live data, you can quickly, easily, and completely restore your important files for immediate use.

## GETTING STARTED WITH MANGO BACKUP IS EASY

Simply sign up for the program on our website, and follow a few simple steps for setup. Once Mango Backup is installed on the same computer as Route Manager, and the schedule is set up, Mango Backup will automatically back up all Route Manager data to a secure off-site server. Mango Backup runs quietly in the background to protect your files, without slowing down your computer. It maximizes efficiency by only backing up new or edited files each day. In case your system was compromised and backed up prior to you recognizing an error, we retain up to 7 backup copies to ensure we have a working copy of your files.

### COMPATIBILITY

Mango Backup! is compatible with Windows 7 and higher, both in the 32bit and 64bit versions.

### MINIMUM REQUIREMENTS

RMA version 6 or newer.
