

FIELD SUPERVISOR

MONITOR ROUTE ACTIVITY FROM YOUR ANDROID DEVICE

Get a complete overview of your operations to help run your business more efficiently:

- ✔ Monitor truck activity
- ✔ Track field sales
- ✔ View release codes
- ✔ Create orders via the web portal
- ✔ View schedules and completed sales/stops
- ✔ Email and SMS drivers
- ✔ And more

As a field manager, you are always on the go. Helping a new driver, dealing with a broken truck, or calling a new customer – you're anywhere except in front of a computer to see how your routes are doing. Mango Supervisor is a powerful software tool that lets you easily monitor route activity throughout the day to better manage your operations – all from your Android phone.

MONITOR YOUR ROUTE ACTIVITY, NO MATTER WHERE YOU ARE

- Monitor truck sales activity
- See where your truck is, and who is done and back at the warehouse
- See which customers have been serviced and who has been skipped today
- Track field sales activity throughout the day, such as who bought and amount paid
- View scheduled and completed stops on a map
- Move orders and stops to a different route to increase efficiency
- Create orders as they come in
- Give out release codes
- See what stock is still remaining in which truck
- And much more

YOUR KEY BUSINESS DETAILS, AVAILABLE AT-A-GLANCE

View route activity as it occurs throughout the day. Using a GPRS or Wi-Fi data connection, the Android handheld on which Mango Supervisor is installed will be able to communicate with the Route Manager server to monitor your route activity continuously.

- **MODE 1: Real-time Activity** - If you have RMLive, you can see activity as it happens throughout the day. As a driver completes a stop, it will immediately show up on your mobile device.
- **MODE 2: End-of-Day Reports** - End-of-day reports enable you to see route totals as each route driver completes their day and uploads their data to your server. The data does not need to be posted – just transferred to the server (desktop).

ROUTE SUMMARY

The Route Summary screen displays route activity for any given date, along with the total sales for the route up to that point. All scheduled and completed stops are shown, including skipped customers and off-route activity.
