

MANGO
PROCESSING

TRAIN THE SOFTWARE TO DO YOUR WORK FOR YOU – EVEN IF YOU'RE NOT THERE

Automate Your Work

- ✔ Save dozens of hours per week on routine tasks such as sales reports and posting transactions
- ✔ Automate repetitive tasks, regardless of how simple or complex
- ✔ Schedule when tasks need to be completed, and how often
- ✔ Get tasks completed, even if you're not there
- ✔ Receive notifications confirming that tasks have been completed

In order to run your day-to-day operations, you are regularly performing tasks in RMA such as preparing sales reports and closing the month. Mango Processing enables you to automate these important, yet repetitive, tasks while saving you dozens of hours per week.

Whether you need to complete a simple task, or a series of complex tasks, Mango Processing will ensure that each process is done correctly and on time. Simply set up a script to do your work for you. For example, Mango Processing can perform tasks such as printing pre-route reports every morning, or posting transactions and closing the month.

WHY YOU ARE GOING TO LOVE MANGO PROCESSING

Automate Routine Processes - Create and schedule step-by-step processes (via a script) that can be executed without user intervention.

Save Time and Reduce Labor Costs - Saving 2-3 hours per day of doing repetitive tasks can save hundreds of hours per year. The cost savings are real and immediate, and large companies can recoup their investment within a matter of weeks.

Reduce Errors - Eliminate the human errors that are inevitable from doing the same thing every day.

Schedule Work to Ensure It Gets Done on Time - Create an unlimited number of scripts and schedule them to run daily, weekly, monthly, or just as a one-time task. For example, you can have one script for weekly processing and another one for month end.

Seamless Integration with RMA - Mango Processing is fully integrated into RMA, making the process that much easier.

AFFORDABLE PRICING

- 30-Day Guarantee.
- 100% satisfaction or full refund.

AUTOMATE YOUR WORK IN 3 SIMPLE STEPS

No programming or coding required!

Set up the scripts to do your work for you, on time, every time – even if you’re not there.

- 1 Choose which task to automate.** From the main dropdown menu, choose which task you would like to run at a later time or on a recurring basis.
- 2 Set up the script.** Simply teach the program, step by step, which actions you need to do in order to finish the specific task.
- 3 Tell the program when to do these tasks,** and how often. Schedule the tasks so that the script knows when to run this set of events – and ensure your reports, posting, period close, and more, are done on time.

The program will then follow your steps – at the appointed time – and do exactly as you have ‘programmed’ it to do.

QUICK SETUP AND MINIMAL TRAINING

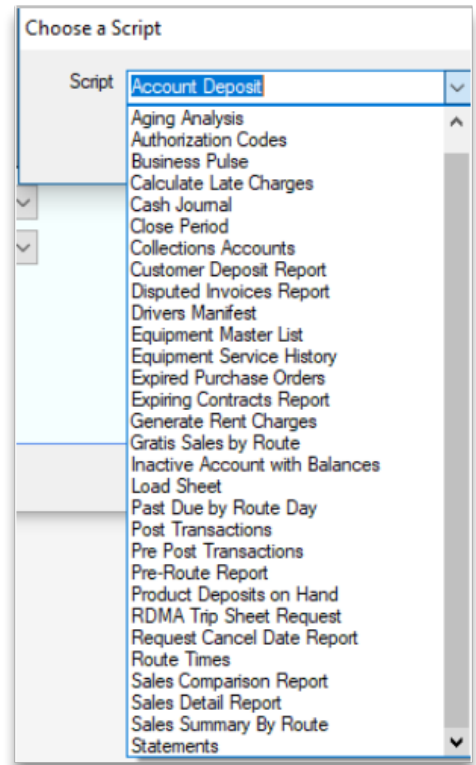

Pre-loaded scripts – Sample scripts are included in the software so you can get up and going within just a few minutes.

Script previews – The built-in Test Program function lets you see your script run before it ever runs on its own.

Notifications – At the end of the routine, you can be notified by email that it was completed. And in case there are any issues, you will be the first to know.

Event Logs – Convenient log will let you know the time each step started and ended.

WHAT DOES IT LOOK LIKE?

SYSTEM REQUIREMENTS

- RMA 6.0.2 or later
- The program can be run from either a workstation or a server.
