mangO POS

PROCESS IN-STORE ORDERS FASTER

FEATURES

- All-in-one unit with printer, barcode scanner, credit card reader and cash drawer
- 2 responsive touchscreens for an even faster checkout
- Accept cash, check or credit cards (tap, swipe or chip)
- Create a separate in-store price list for added discounts

Mango Point of Sale (Mango POS) is a stand-alone unit that integrates directly with your Route Manager POS software. This unit helps customers check out faster when they walk through the doors of your retail location. Here are two reasons why our customers love Mango POS.

1. The powerful unit has dual screens, integrated printer, optional scanner, credit card reader and cash drawer for all of your point of sale needs.
2. Operational efficiency is increased by working directly through the Route Manager program so your product inventory and customer details stay up-to-date.

A MORE EFFICIENT WAY TO SERVICE CUSTOMERS

Better Customer Service – Easily process transactions in-store to help customers checkout faster. Reduce wait times and lineups in your store.

Process Cash or Credit Sales – Allow customers to pay by cash, credit card, check – or charge the sale. If you accept credit cards, it is easy to swipe your customer's card to ring up the sale. *If you do not currently accept credit cards, we can recommend a processor that is compatible with RMA and Mango POS.*

2 Convenient Touchscreens – The POS software is viewed on dual screens. One for your employee and one for your customer. This lets the customer see what they are buying and facilitates payment processing.

Process Transactions Quickly and Easily – Whether selling to existing customers or walk-up customers, Mango POS allows you to provide a speedy and convenient checkout service consumers expect these days.

Integrate Directly with RMA – All of your product inventory and customer details are kept up-to-date directly through Route Manager.

Works with 2D Barcode Scanners – No more entering products or remembering product IDs! Easily scan codes with a wireless barcode scanner to help you easily manage your inventory.

Separate In-Store Price List – Build a separate pricing list into the point-of-sale system to be used without an override. This is helpful if you have lower pricing for customers who buy in-store instead of having deliveries made on route.
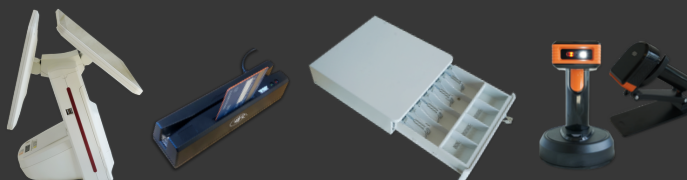

HIGH QUALITY HARDWARE WITHOUT THE HIGH PRICE

$ 949
+$20 Reoccurring Monthly Fee
